

## What is THREE S® Approved Used?

All Melco products have been painstakingly designed and manufactured to deliver audiophile performance for many, many years. But we are always developing new products for tomorrow. Subsequently, our equipment evolves in our search toward audio perfection. Some improvements come in the form of software enhancements, all of which are available for users and/or their dealers to upgrade over the air. However, there also comes a time when technology changes significantly enough that we feel the need to introduce new products that will supersede existing models. For most companies, this will spell the end of the support offered for past products. Here at Melco, however, we want to keep our products going for many years, whether they are owned by the original purchaser or sold on to someone else to enjoy.

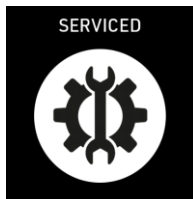

### Introducing the Melco THREE S® Approved Used programme

#### Selected

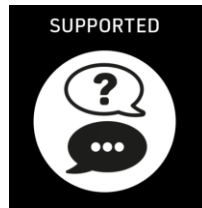

Simply speaking, any product selected for the THREE S® programme has been selected by our engineers as being previously well looked after and aesthetically clean. Obviously, with any pre-loved item, there might be the odd nick here and there that is not unusual from normal domestic usage. But our THREE S® promise means that the unit is in good aesthetic order, has never been internally messed around with by unqualified personnel and comes with our promise that we have selected it as in great condition for the next owner.

#### Serviced

THREE S<sup>®</sup> isn't just giving the machine a Quick Look inside. As part of our promise, our engineers check the quality and reliability of the internal HDD or SSD drives, cleaning off any old files and bringing them up to the latest software specs. All electrical circuits are tested and the machine will be soak tested to ensure that it meets the latest spec for the machine. The whole product is cleaned up, it's THREE S<sup>®</sup> badge applied, re packaged where necessary and returned to the dealer as if fresh from the factory. Crucially, and THREE S<sup>®</sup> labeled product is also given a fresh new 1-year warranty, supported by the UK Melco distributor. So not only will you be able to buy a Melco digital music library at a significantly discounted rate, you also have the full support as if you had purchased a brand new unit.

## Supported

Total peace-of-mind means just that when purchasing a THREE S<sup>®</sup> product. Not only do you receive the 1-year warranty, you also have access to exactly the same support from Melco's UK distributor as if you had purchased a new product. Whether wanting to condense a large digital music collection from various drives or computers onto a single Melco library, or transferring music from one protocol to another, our UK-based support is always available to answer any questions and offer the very best advice to give you music perfection. With THREE S<sup>®</sup>, you are buying into a brand, and with that comes all of the support you will ever need.

All THREE S<sup>®</sup> Approved Used Melco products come with the THREE S<sup>®</sup> badge on the front panel to help differentiate them from non-approved products. Only available from Melco Master Dealers (MMDs), THREE S<sup>®</sup> Approved Used products give audiophiles the opportunity to enter the Melco eco system at a significantly reduced price, yet with the peace-of-mind traditionally only attributed to new product purchases.
