

Little Fwend™ mounting instructions

LOW / P8/P10

Pull out the transit “T” securing your fwend and the custom P8/P10 mounting platform.

In the toolkit envelope there is a 1.5mm hex key and extra mounting discs in case you want to use your fwend on a standard solid turntable plinth. Mounting instructions and videos can be found at littlefwend.com.

Loosen the base set screw and pull out the base and the top part (take care not to bend the trigger antenna). Lower the top part into the base and set aside. Do not tighten the set screw at this point.

Gently push the friction-fit mounting platform into the circular opening between the platter and tonearm base with the recess facing the platter. Align it so that the recessed arc follows the curvature of the platter. The metal disc is now in the correct position.

Attach the fwend to the mounting disc with the trigger antenna pointing towards the spindle.

Place a 12-inch record on the turntable and point the stylus towards the run-out area approximately 10mm out from the edge of the paper label and lower the stylus.

Check if the height is correct. There should be approx. 1mm clearance between the rubber beam and the tonearm while the stylus is lowered in the groove. Readjust if necessary and gently tighten the set screw.

As a precaution before the final adjustment, raise the stylus up from the groove. Keep the tonearm pointing in the same direction, approx. 10mm out from the paper label.

Rotate the fwend counter-clockwise until the trigger antenna touches the tonearm tube.

Place the tonearm back in its secure position and reset the trigger antenna.

Check that everything works fine by playing from the end of the last track.

If you want your fwend to trigger earlier or later in the run-out groove, rotate the magnetically attached base as desired. The baseline setting will cover most 12” records.

Before playing the next side, remember to reset the trigger antenna. You might forget to reset your fwend the first day, but this new routine soon becomes second nature.
